

Missouri River Flood of 2011

Updates on Closed Roads in Missouri

October 11, 2011

Interstate 29 NOW OPEN

- Interstate 29 opened on Saturday, October 8th.
- According to information from the Iowa Department of Transportation, temporary lane crossovers will be in place at mileposts 0.8 northbound and 3.2 southbound, near Hamburg, Iowa. Two-way traffic conditions will be present between the crossovers with vehicles diverted into the southbound lanes. The crossovers are necessary to avoid a bridge in the northbound lanes that suffered damage.
- Exit 1, Iowa 333 to Hamburg; and exit 10, Iowa 2 to Nebraska City, remain closed. These roads sustained substantial damage due to the flooding and must be repaired. Iowa plans to restore traffic on these roadways as quickly as possible.
- While the Interstate has reopened, travelers are reminded that access across the Missouri River is still limited. The bridge on US 36 at St. Joseph, MO remains open, however all river crossings in Missouri, north of St. Joseph, are closed. The first river crossing in Iowa is on US 34, crossing from Glenwood, Iowa to Plattsmouth, Nebraska.

US 136, Atchison County (Closed from I-29 to the Nebraska State Line)

- A Second Emergency Contract was awarded October 6th to Leavenworth Excavating & Equipment Company, Inc., of Leavenworth, Kansas to repair the last and largest scour hole on US 136. An earlier Emergency Contract was awarded to the same contractor to repair three scour holes east of Route D.

US 159, Holt County (Closed from Route P to the Nebraska State Line)

- An Emergency Contract was awarded September 30th to Ideker, Inc. Work is to begin this week with a projected completion before December 15, 2011. This will not include full depth paving or resurfacing. That work will be part of a later repair contract.

US 59, Buchanan County NOW OPEN

- Opened to traffic on September 28, 2011 after emergency repairs were made. The road will be resurfaced, weather permitting, starting October 13, 2011. The work will take approximately 10 days to complete and the road will remain open during the resurfacing project.
- Kansas is beginning Missouri River bridge rehab work, which may impact travelers. Please check the Kansas Department of Transportation's website at the link below.
